chinery for the work. They will get the commands Cash. The prospects of the drill at work about the 15th inst. after as possible, until the question is settled, present. The people are united, they can ing. The inhabitants were said to subat least as to that particular locality. It work together and do so; and no one is sist upon muskrats, frogs and fish, and is not supposed they will be obliged to go watching, lest his neighbor shall get an to use muskrat skins and shingles as a over 400 feet deep to find the requisite advantage. Every one feels that his in- In 1822 the government stationed some strength of brine, but as no shaft has been sunk in this region at any time, it is impossible to tell the thickness of the his interest. This is as it should be, and underlying rock, There is every confidence of success on the part of the Directors. In fact there has never been but one opinion expressed by those qualified to judge on such subjects and that is, that there is no doubt but that we are in the centre of a great salt basin extending either way with a radius of from ten to fifteen miles, and perhaps even greater, After this Company have determined the thickness and kinds of underlying rock, the geological formation will be better understood. OUR COAL FIELDS.

Lower Peninsula. On the Shiawassee ter &c., that will essentially improve river, about twenty miles above here, a the appearance of the next issue, which The Streeters employed by covern. inches in thickness, another of 24 inches graphy. and terminated in a vein six feet in thickness. The quality is said to be nearly equal to the best Briar Hill. Coal has also been found on the Flint and Cass rivers, but as yet no shafts have been sunk. Prof. CHALLIS, an old and experienced Geologist, in exploring on the Cass this spring, found and brought down with him quite a number of specimens of Cannel Coal. He says it is of a very fine quality and he has not a doubt but that

it exists in very large quantities. Here is a fine field for improvement, with our facilities for shipment to all ports on the Lakes, and with the ease with which the Coal can be raised, it would seem wonderful that it has lain unoccupied so long. At Jackson, in this State, the miners are obliged to go, some ninety feet deep, while ours, is fully equal in quality. Our mineral rescources are however becoming known, and more attention has been devoted to explorations. within the last six months, than during the six years preceding.

Ague Cure

No one remedy is louder called far by the necessities of the American people than a sure and safe cure for Fever and Ague. Such we are now enabled to offer, with a perfect stallary that it will eradicate the disease, and with assurance, founded on proof, that so harm can arise from its use in any quan-

LOWELL, MASS,

The opinion is general that we are too far north have a good climate or raise fruit, but such is not the fact. Owing to our proximity to the lakes, our being surrounded by water, or some other reason, frosts are not early, nor our winters extremely cold; we are more favored in this respect than some portions of the States much further south. I have no particular theory to advance as a reason for this, but simply state it is a fact.

H. Circuit for the year 1859 and 1860, as follows:
